### ## 1. Introduction

The Real Estate website is designed to showcase properties and provide information to potential buyers, sellers, and investors. This documentation will guide you through the various pages and features of the website.

### ## 2. Home Page

The home page is the landing page of the website. It typically includes a welcoming message, a search bar for property search, featured properties, and any promotional banners or offers. The home page aims to provide an overview of the website's offerings and attract users to explore further.

### ## 3. About Page

The about page provides detailed information about the real estate company or agency. It may include the company's history, mission statement, team members, achievements, and any unique selling points. The about page helps build trust and credibility with the visitors.

### ## 4. Projects Page

The projects page displays a list of available real estate projects. It typically includes a grid or list view of properties with essential details such as property name, location, price, and key features. Users can click on a project to view more details.

### ## 5. Contact Page

The contact page offers a means for users to get in touch with the real estate company. It usually includes a contact form or contact information such as phone number, email address, and physical address. Users can use this page to inquire about properties or seek assistance.

### ## 6. Login Page

The login page allows registered users to access their accounts. It usually includes input fields for username/email and password. Additionally, there may be options for social media login or account recovery. Upon successful login, users can access their personalized features.

### ## 7. Register Page

The register page enables new users to create an account on the website. It typically includes a form for users to provide their details such as name, email, password, and contact information. Upon successful registration, users can log in to access the website's features.

### ## 8. Project Details Page

The project details page provides comprehensive information about a specific property. It includes details such as property images, description, features, floor plans, pricing, and contact information. Users can use this page to evaluate the property's suitability and express interest.

### ## 9. FAQ Page

The FAQ (Frequently Asked Questions) page addresses common queries and concerns users may have. It includes a list of frequently asked questions along with their respective answers. The FAQ page helps users find quick solutions to their inquiries and improves user experience.

### ## 10. Blog Page

The blog page showcases a collection of articles related to real estate. It typically includes a list of blog posts with titles, publication dates, and brief excerpts. Users can click on a blog post to read the full article.

### ## 11. Blog Details Page

The blog details page presents the complete content of a blog post. It includes the article's title, author, publication date, and the full text. Users can read, share, and comment on the blog post. Additionally, there may be related posts suggested for further reading.

### ## 12. Animation Library

The website utilizes the Animation JS library to enhance the user interface and create engaging visual effects. The Animation JS library offers a wide range of animation options such as fade-in, slide-in, parallax effects, and more. Developers can refer to the Animation JS documentation for implementation details.

### ## 13. Carousel Library

The website incorporates a Carousel library to display property images or other visual content in a dynamic and interactive manner. The Carousel library provides features like image slideshows, navigation buttons, autoplay, and customizable settings. Developers can consult the Carousel library documentation for integration instructions.

This documentation provides an overview of the Real Estate website's main pages and features. Developers can refer to specific libraries' documentation for detailed implementation instructions.
